WORKSHEET: GRADE POINT AVERAGES

[do not submit this page with your application summary – it is only for your reference]

You may use the chart below to compute your grade point average, to be reported in the on-line University application form.

For each undergraduate year and for all graduate years enter the number of credit courses (not semester-hours or quarter-hours) for which you received each of the letter grades (or their equivalents). EXCLUDE all non-credit courses, and credit courses in physical education, sports, dancing, band or orchestra, chorus or glee club, speech or public speaking, ROTC or military training.

GPA is to be reported by all applicants from colleges or universities that use a five-category (five letters or five numbers) grading system or other grading system for which the college or university has established a formula for converting its grades into the equivalents in a five-category system. "A" denotes the highest grade, "B" the next highest, and so on, "F" denoting the failing grade. The grade "WF" (withdrew failing) or its equivalent should be counted as an "F."

	UNDERGRADUATE					GRADUATE			
	Yr 1	Yr 2	Yr 3	Yr 4	Total (a)	(b)	(a)	(b)	
Number of A's						x 4		x 4	
Number of B's						x 3		x 3	
Number of C's						x 2		x 2	
Number of D's						x 1		x 1	
Number of F's						x 0		x 0	

Grade point average = Total of column (b) divided by total of column (a)

UNDERGRAD GPA: _____

GRADUATE GPA: _____

NOTE: GPAs are to be reported as part of the on-line application – this page is a worksheet and is not to be submitted with your application materials.
